

Notes for all pool liners

- Designed for use in domestic pools with normal bathing loads
- 29°C maximum running temperature
- Five year pro-rata guarantee
- Material is impregnated with algicide
- Patterned material has a protective laquer coating
- Tilebands are triple coated with laquer to help prevent staining at the water line
- Liner samples are available on request. Ring to check stock as availability is subject to constant change.

Remember:

We individually tailor every liner to your dimensions, so please use our liner order form on page 1 of the Plastica Forms booklet or our liner booklet "How to measure a Liner Pool" which will give us all the details and dimensions to manufacture your liner to close tolerances – to give you a perfect fit first time.

Note:

All Plastica patterns and materials are available in 0.75mm only except where shown. Wall materials can sometimes be used as tilebands. See chart for details.

Plastica domestic liners are designed for use in private domestic pools with normal bathing loads, run below 29°C (84°F) only.

Please use the chart shown for the mix and match combinations available.

Please note: Patterned materials cannot be matched along welds. Due to undersizing, liner walls can sometimes run onto floor area and vice-versa so we therefore ask you to ensure the end customer is aware of this.

All our pool liners are manufactured using the best European and American vinyls available. Exact standards are used in the fabrication techniques in our modern factory. These domestic liners have a 5 year limited guarantee against material and manufacturing defects when used for domestic applications in pools running at temperatures of up to 29° Centigrade (84° Fahrenheit) with chemical and dissolved solid levels within SPATA standards.
