

Swimmer Pool Kits

# Come on in, the water's lovely!

What better way to enjoy your valuable leisure time than to relax with friends and family in your own swimming pool?

Owning a pool has never been easier and in reality it's as affordable as a second car, a caravan or timeshare and there is nothing like it to bring the family together, to relax and enjoy the essence of the good life.

Having your own pool also lets you enjoy holidays at home every day. No packing headaches, airport stress or battling for a sun bed, just saunter out and take a dip whenever the mood takes you, day or night.

And don't forget swimming is an important life skill as well as a great confidence booster for children and as it is recognised as one of the best forms of exercise you can also use your pool to get fit.

Whatever you choose to do, you'll have the freedom to swim and have fun whenever you want.

# Bring your dreams to life

The Swimmer pool system offers you a total solution . . .

No waiting for concrete to cure or tiles to set, the proven polymer panel construction method and the integrated design means that the pool walls can go up in a matter of hours allowing you the opportunity to design the ideal pool for your home and then have it installed and working in double-quick time.

You can also customise your design with the addition of an internal step unit or Roman end for easy access, or how about adding a counter current unit for added fun and fitness, a child safe cover for greater peace of mind or a heater to extend the swimming season even further?

# Endless possibilities

Thanks to a combination of four different lengths of straight panels and special 2' radius corner sections almost any size of pool can be produced to suit your budget.

The standard depth of a pool is 48" (1200mm) although this can be increased by incorporating a sloping, wedge or hopper floor to create a greater depth of water.

Personalise your pool by choosing a liner to match your setting. Options include; classic mosaic, modern marble or contemporary monochrome designs, the choice is yours. If you want to take it a step further, then pick a waterline border to complement or contrast with the liner of your choice.

*Colours and patterns shown may be subject to change, and are reproduced here within the limitations of the printing process.*

# Peace of mind as standard

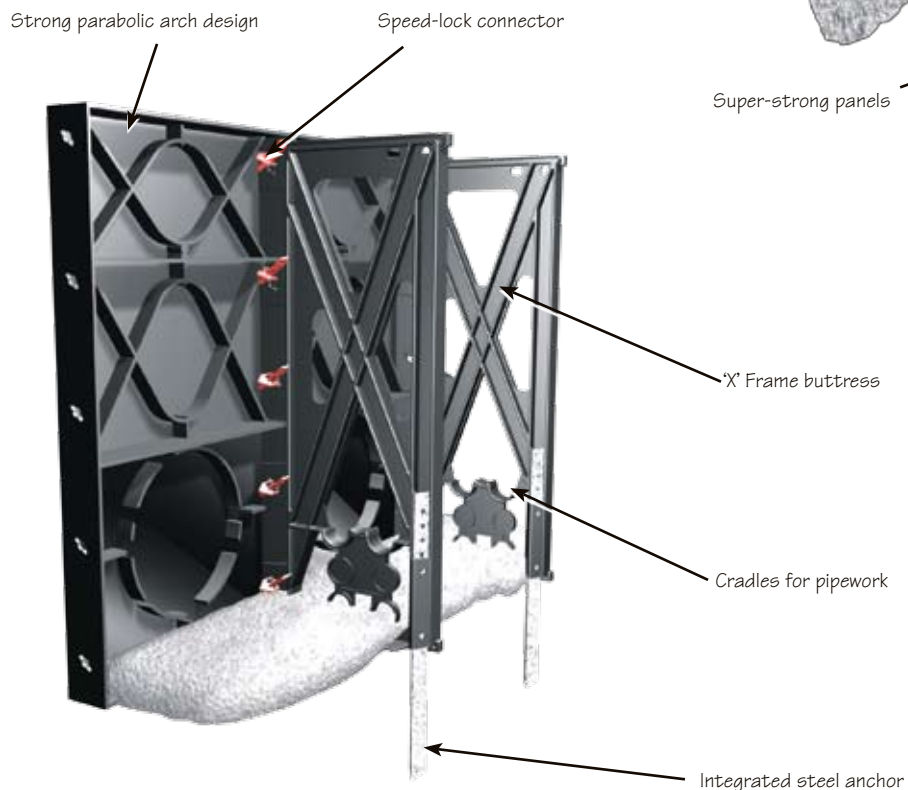

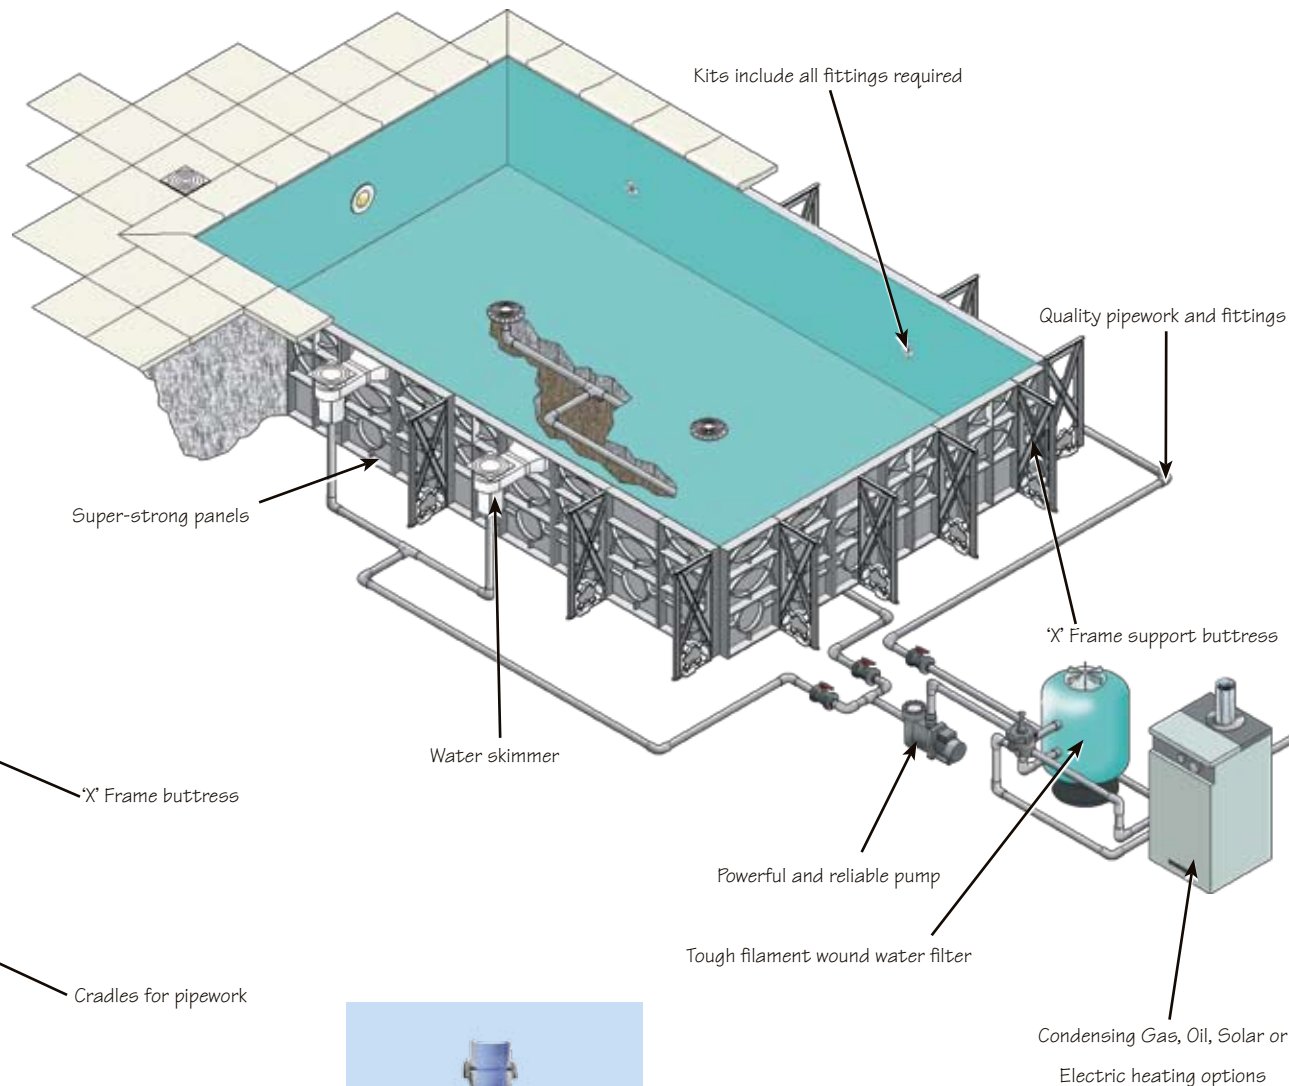

By utilising the latest technologies, our design engineers have created a swimming pool system that combines elegant engineering solutions, advanced construction methods and state-of-the-art materials to ensure your pool will withstand the tests of time and provide you with many years of enjoyment.

Using the concept of the parabolic arch, strength and rigidity has been designed into the panels which are assembled using either our patented Speed-lock connection system or the traditional nut and bolt method. The support buttresses feature a proven 'X' frame design, moulded pipework cradles and integrated steel anchors which when combined with the panels give a wall structure of unparalleled rigidity and stability.

The completed pool structure is further strengthened through the use of our innovative panel capping, a 4" wide heavy duty aluminium extrusion that also includes the liner fixing point.

Whether you decide to build your pool yourself or let the professionals do it for you, you have the option to choose the solution that best meets your needs.

For the self build enthusiast both the Swimmer pool panels and buttresses incorporate a number of unique features to help make the installation so much easier.

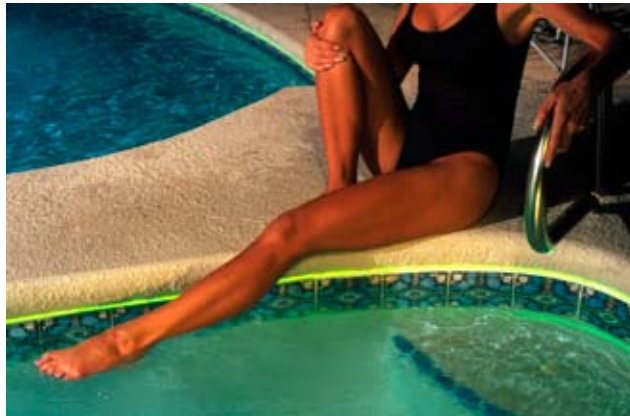

Your pool kit will include everything needed to get you swimming including a Multi Cyclone pre filter that will not only improve the clarity of your pool water but also save you thousands of litres of water every year normally wasted with traditional methods of filtration.

# Added enjoyment

To add to the enjoyment you get from your pool we have a wide range of accessories to choose from.

Traditional lighting can change the way your pool looks, but fibre optic or LED lighting will change the way you look at your pool.

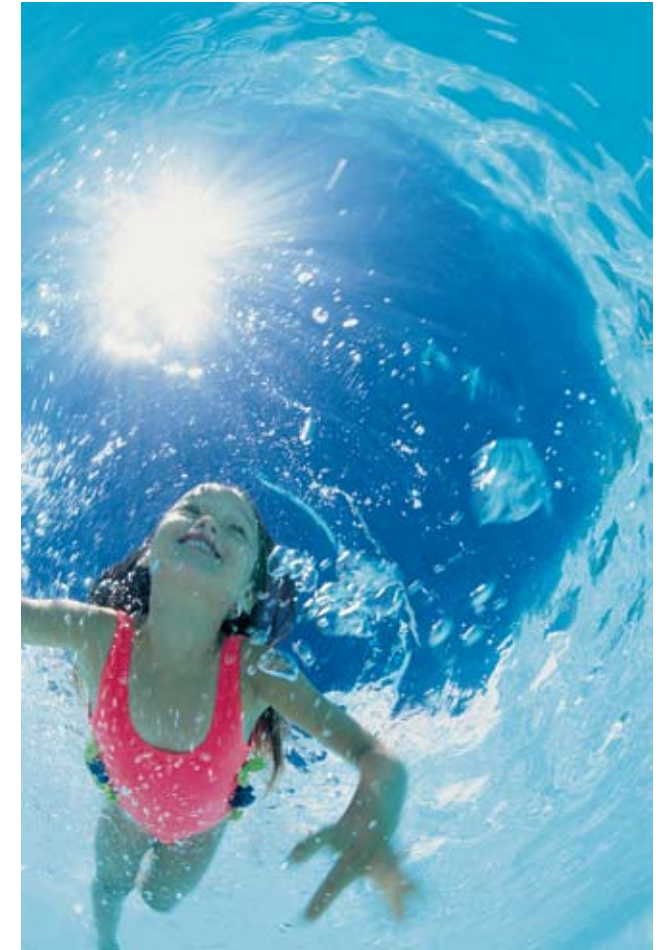

Paint the outline of your pool with a stunning pallet of glowing colours, highlight your steps or dramatically change the mood of the evening with subtle or exciting effects when the sun goes down.

A choice of automatic pool cleaners are available to ensure you spend more time relaxing in your pool.

We have various heating options to extend your swimming season including solar, condensing gas, heat exchanger, oil and heat pump.

The addition of a Counter Current to your pool will add a new dimension of fun and fitness to swimming. Enjoy the benefits of a real work out as you swim against an adjustable current of water or take the easy option and use it for a relaxing massage.

Covering your pool is an essential part of pool ownership ensuring valuable heat is kept in and dirt debris and unwanted visitors are kept out. Options are available from a standard solar bubble cover to a complete safety system that will safeguard against accidental entry by pets and children.

Whatever you choose, your Swimmer pool will be an investment that guarantees to provide years of enjoyment to everyone and memories that will last a lifetime.

Why not take the dream further with the inclusion of a sauna. A wide range of standard and kit form models are available to compliment your leisure space and create a luxurious space to relax and unwind with family and friends.
