

*Starline Roldeck,  
a better pool cover, automatically.*

**STARLINE**  
ROLDECK

A good pool cover is the essential finishing touch to your pool. What's more, it can save you up to 70% of the energy costs your pool water pumps clean and the pool is made safer for children and pets. The Starline Rolltek offers you more

## *The most attractive, safest pool cover*

than convenience and durability. This cover is by far the most attractive solution for the protection of your swimming pool. The streamlined design of the floating mats adds to the aesthetic value of your pool. Starline Rolltek offers you several systems that have at least one thing in common: Starline's unmatched quality.

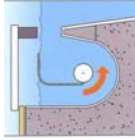

STARLINE. RELAXING LUXURY

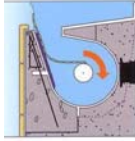

STARLINE  
ROLTEK

With zero roller bearings, a hard plastic slide rail, and a stainless steel axle, the cover and frame are completely invisible.

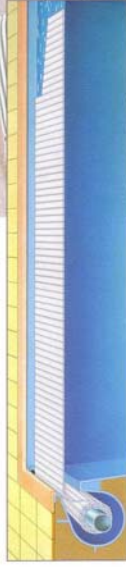

Starliner Rolltek sets for swimming, leisure, energy, filter, and more.

The Starliner Rolltek consists of a system of floating lensed slide rails rolled around a stainless steel axle. Opening and closing the cover is effortless and silent. The drive and rolling mechanisms are completely integrated into the swimming pool, and hidden from view. Sophisticated technology and a special

## Invisible mechanism

meets in the swimming pool water. It is possible to install the Starliner Rolltek completely below the water level. The many options available make the Starliner Rolltek particularly attractive for swimming pools of all types and dimensions.

## At the press of a button...

Luxury and convenience, at your service. A Starline Bulbick is the most practical and comfortable pool cover imaginable. The silent motor is engaged at the

simple press of a button. As soon as the cover is fully open or closed, the motor stops automatically. You can also stop the movement of the cover at any time.

The size of operation means your swimming pool can easily be covered for shorter periods. Therefore, you not only have ease of use but also considerably additional energy savings and you need spend less time on pool maintenance. Not only good for you, but also for the useful life of your swimming pool.

KOLBECK

The Starline Boldock is a unique system that can be used with swimming pools of virtually any shape or dimensions, indoor or outdoor, large or small, there are

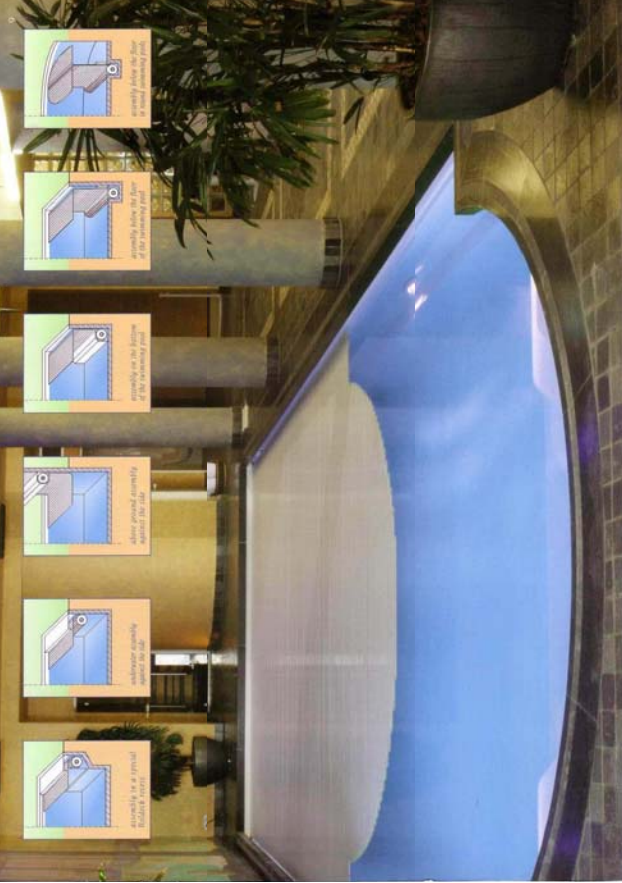

## One system, many possibilities

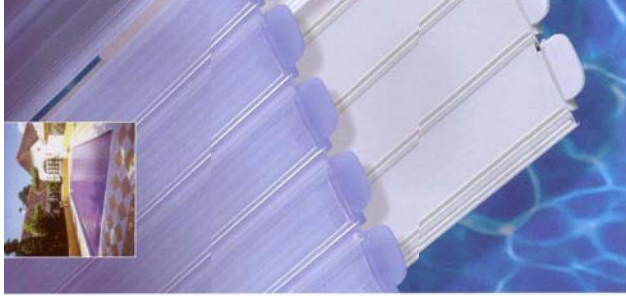

hardly any limitations. Your Boldock is produced to fit your pool like a glove, using modern computer technology. Whether you have a polyester, liner or tiled pool, a Starline Boldock is the ideal swimming pool cover. The Starline Boldock can be installed in various ways. The illustrations above show some of the possibilities - from left to right:

STARLINE. RELAXING LUXURY

STARLINE  
BOLDOCK

Starline Rolltek is available in a range of versions and colours. While solid laminated slats block out light and ensure the growth of algae, transparent slats in combination with underwater lighting make for a spectacular sight. For this reason, transparent laminated slats are particularly suitable for outdoor pools. For outdoor pools a special 'water diffusion' is available. With the laminated roller slats,

## Quality on top

you can use the sunlight to directly heat the water in your pool. This represents a double energy saving. All versions are made from hard PVC, a high-quality, strong plastic, resistant to all weather influences and with a long life. The ultravioletly stabilised end caps are made in the same colour as the slats and guarantee an absolutely watertight seal.

The Starline RollUp not only saves energy and maintenance, but also provides additional safety for (small) children and pets. The strong, hard PVC slats form

## Safe for children and pets

a very sturdy structure. With a simple device that supports the slats along the sides of the swimming pool and a specially designed electro-mechanical locking device\*, you have a safe cover. Children and animals can play around the pool to their hearts' delight, without you being constantly concerned for their safety.

Once the Solback has reached the closed position, the safety lock will automatically engage. A stainless steel fence, invisibly mounted along the edge of the pool, then grips the special loop on the lid. This is fully automatic so you cannot forget to safely lock your cover in place. When you open the Solback, the lock will automatically open before the cover moves.

\* The Solback and Manual Lock System is only available with Standard, Standard Economy pools.

A long, useful life is guaranteed by the use of top quality materials. Thanks to 30 years of experience, StarLine Bolid's quality, work-facilities and reliability are unsurpassed. By using state-of-the-art manufacturing techniques, we are also able to create a product that can always be made exactly to size and that delivers

## *A cover that will last*

trouble-free functioning. Every Bolid is given an extra quality inspection upon leaving the factory and supplied ready for assembly with all the necessary parts and materials. In this way, StarLine guarantees you a cover that will give you a great deal of pleasure and convenience. As well as looking out of this world.

The optional Ice-Buster motor is a highly sophisticated piece of technology. A maintenance-free system with a faultless action.

Benefits of the Ice-Buster motor:

- highly advanced drive system (retrofitable)
- motor disengages without disconnection
- high-impact drive with extremely long life
- specially raised for maintaining roof membranes
- no motor pit necessary
- no holes required in the pool sides under water
- optimum stability thanks to multi-point bearings
- possibility for free rotation (so your pool can always be covered)
- 100% self - flanks to low voltage
- motor-actuated limit stop

#### Technical specifications: Sunrise Rolltec

Material:	Hard PVC
Weight:	approx. 4.8 kg/m <sup>2</sup>
Colors:	White, Blue, Grey, Transparent, Solar (transparent top surface / back silverized)
End panel:	PVC on the inner side at the built-in aluminum ending
Construction:	100% self-actuating
Drive:	24 V synchronous motor or built-in solar motor
Building status:	4 to 6 °W/m <sup>2</sup> K (depending on wind speed/direction)
Energy saving:	Indoor pool up to 20%, outdoor pool 60 to 80%
